Chem Link by Soprema: High-performance Adhesives, Sealants & Coatings

SPS Cleantech is an authorized Distributor of the Chem Link (a division of Soprema), line of high-performance adhesives, sealants, coatings, and related products. Their sealants and adhesive products are based on proprietary formulations that combine the highest performance with low environmental and human health risks.

M-1 CR SEALANT

The M-1CR (clean room) Sealant is designed specifically for controlled environments where molecular airborne contamination can impact human health. It is the perfect solution for cleanroom manufacturing operations in pharmaceutical, biotech semiconductor and food & beverage cleanrooms.

The M-1 CR is a polyether-based sealant that is solvent-free, has extremely low VOC and is designed for application in areas where outgassing and solvents are not tolerated. It releases virtually no molecular air contamination and contains no isocyanates. It also cannot "out-gas" on damp surfaces as is common with urethane sealants.

- 100% VOC Compliant ~ less than 15 grams/liter
- Tough elastomeric bonds
- Solvent Free
- Fast Setting
- High adhesion
- Will not shrink or discolor when exposed to UV light
- Paintable within 24 hours
- Available in white or grey color
- Gun grade, no special tools or mixing required
- Can be applied at temperatures as low as 32°F (0°C)
- Validated for $\pm 25\%$ joint movement
- Available in a 10.1oz/300ml Cartridge or a Field Pack with qty 16 Cartridges.
- Made in the USA – ISO 9001:2015 certified

Contact SPS CleanTech, LLC for unique solutions to help design, build, renovate, or furnish a clean space – we are here to serve!

B26 CAULK GUN

Due to the viscosity of the M-1 CR Sealant, it is highly recommended to utilize Chem Link's Albion B26 Caulk Gun. This heavy duty Caulk Gun has a high thrust ~ 26:1 mechanical advantage drive. Designed for use with the M-1 CR 10 oz /300 ml Cartridges.

- 26:1 thrust ratio makes it easier to apply the M-1 CR Sealant
- Full-sized handle for comfortable, efficient dispensing

- Half-cradle carriage securely holds cartridges and rotates for convenience.
- Includes built-in cartridge puncture wire and ladder hook pull.

DURASIL® SEALANT

The DuraSil Sealant is a neutral-cure silicone sealant used for many applications. It can be used to fill gaps on ceiling coves and around door and window frames. Durasil is designed for use on dissimilar materials such as glass, aluminum, steel and engineered plastics. DuraSil is stable at temperatures up to 400°F (204°C).

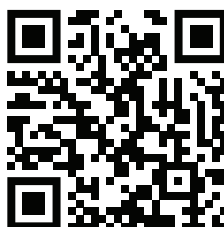

- Neutral-cure, low odor
- Solvent-free, 100% solids will not shrink upon curing
- Virtually no VOCs
- Non-slump, can be applied vertically and overhead
- 10-minute skin over
- Color stability, will not suntan

- Will not promote corrosion of metal
- Available in white, grey, black or translucent color
- Color matching available in bulk quantities
- Validated for $\pm 50\%$ joint movement
- Available in a 10.1oz/300ml Cartridge or a Field Pack consisting of qty 24 Cartridges.
- Made in the USA — ISO 9001:2015 certified processes
