Digital PoE Clocks

When furnishing a cleanroom, it is not unusual to overlook the need for an accurate clock. Novanex Digital Clocks are specifically designed for cleanrooms that require accurate synchronized time across a facility, have high visibility and can withstand the harshest cleaning regime. Novanex Digital Clocks are built on Power over Ethernet (PoE) technology where both the time and the power are provided by the network through a powered ethernet cable.

- Three Mounting options: Wall-mounted (surface or recessed) or Ceiling-mounted
- Does not require a master clock, electrical outlets or batteries
- Power is supplied over standard Cat 5 or Cat 6 cabling using IEEE 802.3af Power over Ethernet (PoE) standard
- 316 Stainless Steel trims and PVC cover that withstands the harsh cleaning chemicals
- IP64 rating
- Available with red or green LED numerals, 4 digits or 6 digits
- 12-hour or 24-hour time display option
- Automatic adjustment for Daylight Savings Times
- Time is set automatically by Simple Network Time Protocol (SNTP) and is accurate within 200 milliseconds
- Visible from 150+ feet
- Low power consumption 9.5 watts maximum
- Operating temperature range of 32 to 104°F (0 to 40°C)
- Easy to install, easily to upload firmware upgrades, virtually no maintenance
- 3 Year Warranty
- Designed and built in the USA
